## **NOISE MANAGEMENT PLAN 14 HYDE WAY, HAYES, UB3 4PA**

**Proposal:** Change of use from a dwellinghouse (C3) to a residential care home for 4 adults (C2) with 1 live-in carer.

### **Risk Assessment**

Potential noise sources include vehicle movements, visitor arrivals, and communal living activities. However, it is not anticipated that four adults and one carer will generate more noise than a typical family home.

### **Mitigation Measures**

- **Physical Controls:** Double glazing will be maintained on all windows and doors to ensure internal noise is contained.
- **Curfews:** Use of the rear garden and out-building will be restricted after 20:00 to protect the amenity of neighboring properties.
- **Visitor Management:** All professional and personal visits will be by appointment only and scheduled between 09:00 and 18:00 to prevent evening disturbances
