

A line drawing of a two-story house. On the left side of the upper floor, there is a chimney with two flues. To its right is a square window divided into four panes. The lower floor features a large garage door on the left and a front door on the right. The front door has a pediment and is flanked by two narrow vertical windows. Above the front door are two tall, narrow windows, each divided into two panes. The entire drawing is composed of simple black outlines on a white background.

A detailed architectural line drawing of a house. The house features a gabled roof with a chimney on the left side. A large, covered front porch is supported by two thick columns. The porch has a flat roof that extends from the main house's roofline. To the left of the porch, there is a small section with a window consisting of four arched panes. To the right of the porch, there is another section with a window consisting of three arched panes. The house is shown from a side-on perspective, highlighting its symmetrical design and the prominent front porch.

A line drawing of a two-story house. The house has a gabled roof. On the left side of the roof, there is a chimney. In the center of the roof, there is a dormer window with a small gabled roof. On the right side of the roof, there is another chimney. The front facade of the house features a central entrance with a door and two windows on either side. The windows are rectangular with double panes. The house is drawn with simple lines and no shading.

A line drawing of a building's structural frame. The structure features a gabled roof on the left side, supported by a vertical column. To the right of this column is another vertical column, and further right is a third column. Horizontal beams connect these columns at three levels. A chimney is located on the roof between the second and third columns. On the far right, there is a small rectangular section with a window containing three arched panes. The entire structure is supported by three concrete foundations at the base.
