

Bat Boxes

Schwegler bat boxes are made from 'woodcrete' and have the highest rates of occupation of all types of box.

The 75% wood sawdust, clay and concrete mixture is ideal, being durable whilst allowing natural respiration and temperature stability. These boxes are rot and predator proof and extremely long lasting.

Boxes can be hung from a branch near the tree trunk or fixed using 'tree-friendly' aluminum nails.

1FQ Bat Box

The latest model from Schwegler is an attractive box designed specifically to be fitted on the external wall of a house, barn or other building. Equally appealing to bats as a roost or a nursery, it features a special porous coating to help maintain the ideal temperature inside as well as a roughened front panel to enable the bats to land securely. Access into the box is via a step-like recess. Inside the box, rough pieces of wood are incorporated into the back of the box which are good insulators and are used by the bats as perches. The internal layout offers three different areas with varying degrees of brightness and temperature. This durable box is easy to attach to most walls, requires no maintenance or cleaning and will last for decades.

Woodcrete (75% wood sawdust, concrete and clay mixture)

Height: 565mm

Width: 350mm

Depth: 85mm

Weight: 15kg

Please note that this box is designed to be fitted to a wall.

Due to the weight it is unsuitable for fences or sheds.
