Dear Mr and Mrs Shah

Thanks for sending me photos, which are most helpful.

Clearly, the tree is struggling with a significant area of bark loss and low crown vitality. I think a realistic possible outcome is that the tree will need to be removed; however, I would like to inspect the tree as there may be other possibilities.

My fee to inspect the tree from ground level using basic survey equipment (mallet, probe and binoculars, as required) and to prepare a written Tree Inspection Report shall be £550.00 + VAT.

If you would like to proceed, please instruct by email confirming acceptance of the fees and terms (attached).

Given my current workload there is a possibility that I would be unable to inspect the tree until January.

Best regards

Patrick
