

Noise Impact Assessment for the Replacement of 3 No. Existing Air Source Heat Pumps

Grand Union Village School, Ballinger Way, Northolt, UB5 6GG

A Noise Impact Assessment is not considered necessary for this proposal, as it involves the direct replacement of 3No. existing i-MAX 06115 Air Source Heat Pumps by MAXA with 3No. proposed ELM LN 75/60 Air Source Heat Pumps by CLADE.

The proposed units have lower Sound Power Level, LW(A) (dB) & Sound Pressure Level at 10m (dB) than the existing equipment and will therefore result in a net reduction in sound emissions. As such, no adverse noise impact is anticipated.
