- HAY-FAR-SW-DR-PA-03312, December 2018 (Proposed Context - East & West Elevations)

These plans are proposed to be revoked as they either provide drawings at a smaller or greater scale than the amended drawings submitted. The same information is provided on the revised plans albeit at a different scale. The previous approved site wide plans and elevational drawings were provided to assess the proposals in the local context and for ease of reviewing drawings. The proposed amendments do not alter the scale or massing of the development and less of a need for sitewide drawings.
