Planning Permission 73289/APP/2017/3976

for

**Phased mineral extraction, including ancillary activities with restoration to agriculture
(AMENDED JAN 2019)**

Non-Material Amendment

1. PERMISSION

1.1 Planning permission has been granted for phased mineral extraction and subsequent restoration requiring the importation of suitable inert material. The permission required further details to be submitted and an application for this was submitted in April 2020.

2. APPLICATION

2.1 The additional information submitted to discharge numerous planning conditions was subject to statutory consultation. During this period of consultation, the Environment Agency (EA) recommended that Condition 7 (monitoring boreholes) should be discharged 'partially' but the current wording of the condition did not permit this.

2.2 The EA recommendation as outlined above, requires Condition 7 to be varied to enable the condition to be discharged in two parts, as well as a change in wording to refer to the two separate components. The variation proposed is set out at **Appendix 1**.
