Dear Madam/Sir,

Re Planning Application at 33, Dawlish Drive. Ruislip. HA4 9SF to increase the rear boundary height.

As to the attached drawings and photographs. Our clients would like to increase the height of the fencing to 2.25M. As you will see in the photographs, the garden slopes down from the house to the left side only, the original panels were at 1.5M, we would like to add to this height with a 60cm open square trellis, with the 15cm gravel boards used to help level the panels, this brings the height up to 2.25M at the highest point coming down to 2.10 at the lowest. The client has no intention of reducing the trellis depth, maintaining the solid fence at 1.5M and so light will always show through.

We would be very grateful if you will accept this application.

Warm Regards

Malena Stratton
