Union Park, Canal Ramp Maintenance

Dear Nick

Thank you for providing us with the update on matters in connection to Condition 10 (Canal Access Ram) of the Slot-In planning permission. I understand that you have received a query from the Canals and Rivers Trust with regards to the maintenance of the ramp and various features associated with it.

This land is under Ark's control and therefore matters relating to the maintenance of the ramp, landscaping, handrails, lighting, and signage will be the responsibility of Ark.

If there are any further queries, please feel free to direct them to myself.

Yours sincerely

Daniel Wright
Head of Construction
