Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

The proposed works comprise limited roof-level alterations to the existing hotel building to facilitate the replacement of roof-mounted mechanical plant. They are needed to support the continued efficient operation of the building and form part of a wider programme of upgrades aimed at improving energy performance and reducing carbon emissions. In planning terms, the proposals are modest in scale and confined to the roof, so they do not materially alter the building's overall form, massing or function. The visual effects of the works are limited due to the existing the brise soleil obscuring the proposed locations of the plant. The proposals will improve the environmental performance of the building through the replacement of obsolete plant with more energy-efficient equipment, supporting the longer-term modernisation of the hotel without giving rise to adverse effects on the surrounding area. There are no changes to the fire routes or systems or changes to public areas including public circulation

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development site area of 0.2 hectares or below

Are there any priority habitats on or within 500m of your site?:
No

Can you evidence that you carried out a site assessment if the local authority disputes the presence of priority habitats?:
No

Please justify the reason why biodiversity net gain does not apply:
The proposed works are located entirely on the existing roof of the Hilton Garden Inn Heathrow. The development comprises the replacement of existing roof-mounted mechanical plant with new Air Source Heat Pump (ASHP) equipment within an area that is currently occupied by hard surfaced rooftop infrastructure. No priority habitat will be affected, removed or modified as a result of the proposals

Please read the help text for further information why developments may be exempt or not in scope.

Industrial or Commercial Processes and Machinery

Does this proposal involve the carrying out of industrial or commercial activities and processes?

- ☒ Yes
☐ No

Please describe the activities and processes which would be carried out on the site and the end products including plant, ventilation or air conditioning. Please include the type of machinery which may be installed on site:

Existing and Proposed Activities/Processes - The site currently operates as the Hilton Garden Inn Heathrow hotel, providing visitor accommodation together with associated hospitality, restaurant, bar, meeting and back-of-house facilities. The proposed development does not introduce any new industrial processes, manufacturing activities or commercial production operations. The primary function and use of the building will remain unchanged following completion of the works.

The proposal comprises the removal of existing roof-mounted mechanical plant and the installation of replacement Air Source Heat Pump (ASHP) equipment and associated building services infrastructure. The equipment will operate as part of the building's heating, hot water and air conditioning systems, supporting the day-to-day operation of the hotel.

Plant, Machinery and Equipment - The principal items of plant proposed as part of the development comprise:

Air Source Heat Pump (ASHP) units located at roof level.
Associated pumps and circulation equipment.
Plate heat exchangers.
Thermal buffer vessels.
Associated insulated pipework, valves, controls and electrical infrastructure.
Replacement air handling units (AHUs) within existing plant room areas.

Ventilation and Air Conditioning - The proposed ASHP installation will provide energy-efficient heating and hot water generation for the hotel and will integrate with the existing building services systems. Replacement air handling units will continue to provide ventilation and air distribution within the hotel. The equipment forms part of a wider building services upgrade and decarbonisation programme intended to improve the operational efficiency and environmental performance of the existing hotel.

End Product - No products are manufactured or produced on site. The development facilitates the continued operation of the hotel through the provision of upgraded heating, ventilation and hot water services and improved energy efficiency. The use of the property as a hotel (Use Class C1) will remain unchanged

(b) an elected member
(c) related to a member of staff
(d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
