Description of Proposal

Does the proposal consist of, or include, the carrying out of building or other operations?

Yes
 No

If Yes, please give detailed description of all such operations (includes the need to describe any proposal to alter or create a new access, layout any new street, construct any associated hard-standings, means of enclosure or means of draining the land/buildings) and indicate on your plans (in the case of a proposed building the plan should indicate the precise siting and exact dimensions)

129 Evelyn Avenue is a residential detached dwelling with an attached garage constructed from brick solid and cavity walls. The roof is hipped and is finished with clay tiles. The application property is located to the North of Evelyn Avenue. The street scene is residential in character and appearance comprising two storey semi-detached and detached houses, mostly with adjoining garages as opposed to a shared flank wall. The surrounding area is open and green in character as the site falls just outside the boundaries of the Metropolitan Green Belt and within close proximity to the Ruislip Town Centre. The property 129 Evelyn Avenue is of semi-detached nature, sharing its garden boundary fences with 127 and 131 Evelyn Avenue. The property at 131 does not match in front elevation and has been extended to the rear (although there is no publicly visible planning history associated to this). The property at 127 matches in front elevation and has recently been granted planning approval (35438/APP/2020/416) – Single storey rear extension, first floor side/rear extension and conversion of garage to habitable use to include alterations to elevations. 129 Evelyn Avenue has a landscaped front garden with parking in the driveway. The rear garden is approximately 42 metres in length and is mostly lawn and planting. The property has undergone both external and internal works since it was first erected. Proposals 1. Repositioning of rear facing windows to rear elevation (first floor) 2. Insertion of 2x Velux FK04 (98cm x 66cm) roof lights to East and West face of front gabled roof 3. Creation of dormer to rear roof face – dormer volume 4.02m3. Dormer structure to be cedar clad. 4. Insertion of aluminium framed window in dormer roof extension (3) 5. Enlargement of existing rear portion of main roof by extending ridge length by 3.46m. The net result being an increased roof volume of 34.86m3 (not inclusive of 4.02m3 proposed dormer). Roof structure and facing material to match the existing. (See total volumetric calculation below).

Does the proposal consist of, or include, a change of use of the land or building(s)?

Yes
 No

Has the proposal been started?

Yes
 No

Grounds for Application

Information about the existing use(s)

Please explain why you consider the existing or last use of the land is lawful, or why you consider that any existing buildings, which it is proposed to alter or extend are lawful

The proposal seeks to utilize the roof space of the property and additional roof volume will allow for an additional bedroom and ensuite bathroom to be formed. The scale of the proposal has been fully considered and direct precedent taken from the neighbouring area, specifically 127 Evelyn Avenue. The volume calculation documents how the proposal seeks to add 38.88m³ under this permitted development application by extending the main roof ridge length to the rear of the property by 3.46 metres and by the addition of the centrally positioned rear facing roof dormer. We are conscious that such proposal falls within the permitted development volumetric increase limit for a detached property of 50m³ and, as such would not be deemed to be contentious in principal and within Permitted Development rights.

Please list the supporting documentary evidence (such as a planning permission) which accompanies this application

Please refer to the supporting drawings, volume calculation and documents supporting this application.

Why do you consider that a Lawful Development Certificate should be granted for this proposal?

The volume calculation documents how the proposal seeks to add 38.88m³ under this permitted development application by extending the main roof ridge length to the rear of the property by 3.46 metres and by the addition of the centrally positioned rear facing roof dormer. We are conscious that such proposal falls within the permitted development volumetric increase limit for a detached property of 50m³ and, as such would not be deemed to be contentious in principal and within Permitted Development rights.
