All measurements will be marked on an A3 sheet commencing North. The scale bar shows that if a drawing is made at 1:100 scale, the drawing will be 10 times smaller than the actual size. If a drawing is made at 1:50 scale, the drawing will be 5 times smaller than the actual size. If a drawing is made at 1:25 scale, the drawing will be 2.5 times smaller than the actual size. If a drawing is made at 1:10 scale, the drawing will be 10 times smaller than the actual size. If a drawing is made at 1:5 scale, the drawing will be 5 times smaller than the actual size. If a drawing is made at 1:2 scale, the drawing will be 2 times smaller than the actual size. If a drawing is made at 1:1 scale, the drawing will be the same size as the actual size.
