Product Description

Metal Climbing Frame.

Igloo & Mushroom Village are themed around 'dwellings' and create two opportunities to let children's imaginations run wild.

You enter one Side through a 'mushroom house' set in a forest and emerge into an arctic landscape through an Igloo on the other.

Additional Product Information

The Igloo & Mushroom Village themed play unit comprises of a central tower that rises to 1.2m high with various accesses. Tree themed panels create a tree house upper level to one side and a snowy peak on the other. It also has a slide on one side and an inclusive climbing ramp, complete with side transfer platform, on the other.

'Mushroom Village' side of the play unit features a tree house defined by two tree trunks and a tree canopy with routed leaves and an inset bird motif, with a little 'mushroom house' underneath the slide. A spotted roof, chimney, and a even a working post box create a place to stimulate imaginative / fantasy games with a social twist. Another small mushroom has a window and a door bell. Woodland flower motifs and a spinning ladybird complete the theming to this side.

The Igloo side of the play unit features an arctic peak central platform, complete with clouds and sun overhead. Access is gained via a climber designed to look like snowflakes and an 'Igloo' has been designed to sit underneath the slide, incorporating door and mini megaphone. A series of spinning snowflakes at various heights can be accessed by all children. The arctic scene is completed with a feature Mother a baby polar bear with peep through eyes and swimming fish
