Condition(s) - Variation/Removal

Please state why you wish the condition(s) to be removed or changed

The Pre-commencement Condition states to submit a Fire Statement shall be submitted to and approved in writing by the Local Planning Authority in consultation with the Health and Safety Executive.

We have discussed this with Hillingdon Planning Department who suggested to present a variation of condition to re-word the condition as this is not relevant for demolition phases.

If you wish the existing condition to be changed, please state how you wish the condition to be varied

Re-wording the first sentence of the condition, changing 'Prior to the commencement of development for each relevant phase within the Outline Area,' to 'Prior start of new-built works on-site of the development for each relevant phase within the Outline Area, except for demolition of the existing....'

The Condition should be read:

Prior start of new-built works on-site of the development for each relevant phase within the Outline Area, except for demolition of the existing, the principles of a Fire Statement shall be submitted to and approved in writing by the Local Planning Authority in consultation with the Health and Safety Executive. The statement should detail how the development proposal will function in terms of:

- i) the building's construction: methods, products and materials used, including manufacturers' details
- ii) the means of escape for all building users: suitably designed stair cores, escape for building users who are disabled or require level access, and associated evacuation strategy approach
- iii) features which reduce the risk to life: fire alarm systems, passive and active fire safety measures and associated management and maintenance plans
- iv) access for fire service personnel and equipment: how this will be achieved in an evacuation situation, water supplies, provision and positioning of equipment, firefighting lifts, stairs and lobbies, any fire suppression and smoke ventilation systems proposed, and the ongoing maintenance and monitoring of these
- v) how provision will be made within the curtilage of the site to enable fire appliances to gain access to the building
- vi) ensuring that any potential future modifications to the building will take into account and not compromise the base build fire safety/protection measures.
