

NEEDS ASSESSMENT FOR 60 BEDDED CARE HOME AT 18 PIELD HEATH RD, UXBRIDGE SITE.

Our organization (Astoria Healthcare Ltd), we offer a broad spectrum of person centered services based on individual needs aimed at achieving or maintaining levels of independence, and provide care and support during times that fit individual preferences and needs during the day or night 24/7. Currently we also providing care and treatment for a large number of clients from Hillingdon Hospital, some of whom have a Mental Health diagnosis and some with high needs Dementia.

Following consultation with Hillingdon Hospital Brokerage Team (Pauline Hopwood), I was advised that there is a demand for these specialist care needs as they are not available within the borough of Hillingdon, and if we could provide the same services within the borough.

The proposed accommodation will fully integrate into the residential surroundings / landscape and be easily accessible to public transport making the journey convenient for visitors, some of whom are elderly to visit their loved ones more frequently.

Whilst providing care and treatment for clients we would also be providing employment to the local community.
