Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England.

Natural Resources Wales Copyright Notice

Contains Natural Resources Wales information © Natural Resources Wales and Database Right. All rights Reserved. Contains Ordnance Survey Data. Ordnance Survey Licence number 100019741. Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

Slice
Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

Segment
A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

Quadrant
A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.

Geology 1:50,000 Maps

This report contains geological map extracts taken from the BGS Digital Geological map of Great Britain at 1:50,000 scale and is designed for users carrying out preliminary site assessments who require geological maps for the area around the site. This mapping may be more up to date than previously published paper maps.

The various geological layers - artificial and landslip deposits, superficial geology and solid (bedrock) geology are displayed in separate maps, but superimposed on the final 'Combined Surface Geology' map. All map legends feature on this page. Not all layers have complete nationwide coverage, so availability of data for relevant map sheets is indicated below.

Artificial Ground and Landslip

Artificial ground is a term used by BGS for those areas where the ground surface has been significantly modified by human activity. Information about previously developed ground is especially important, as it is often associated with potentially contaminated material, unpredictable engineering conditions and unstable ground.

Artificial ground includes:

- Made ground - man-made deposits such as embankments and spoil heaps on the natural ground surface.
- Worked ground - areas where the ground has been cut away such as quarries and road cuttings.
- Infilled ground - areas where the ground has been cut away then wholly or partially backfilled.
- Landscaped ground - areas where the surface has been reshaped.
- Disturbed ground - areas of ill-defined shallow or near surface mineral workings where it is impracticable to map made and worked ground separately.

Mass movement (landslip) deposits on BGS geological maps are primarily superficial deposits that have moved down slope under gravity to form landslips. These affect bedrock, other superficial deposits and artificial ground. The dataset also includes foundered strata, where the ground has collapsed due to subsidence.

Superficial Geology

Superficial Deposits are the youngest geological deposits formed during the most recent period of geological time, the Quaternary, which extends back about 1.8 million years from the present.

They rest on older deposits or rocks referred to as Bedrock. This dataset contains Superficial deposits that are of natural origin and 'in place'. Other superficial strata may be held in the Mass Movement dataset where they have been moved, or in the Artificial Ground dataset where they are of man-made origin.

Most of these Superficial deposits are unconsolidated sediments such as gravel, sand, silt and clay, and onshore they form relatively thin, often discontinuous patches or larger spreads.

Bedrock and Faults

Bedrock geology is a term used for the main mass of rocks forming the Earth and are present everywhere, whether exposed at the surface in outcrops or concealed beneath superficial deposits or water.

The bedrock has formed over vast lengths of geological time ranging from ancient and highly altered rocks of the Proterozoic, some 2500 million years ago, or older, up to the relatively young Pliocene, 1.8 million years ago.

The bedrock geology includes many lithologies, often classified into three types based on origin: igneous, metamorphic and sedimentary.

The BGS Faults and Rock Segments dataset includes geological faults (e.g. normal, thrust), and thin beds mapped as lines (e.g. coal seam, gypsum bed). Some of these are linked to other particular 1:50,000 Geology datasets, for example, coal seams are part of the bedrock sequence, most faults and mineral veins primarily affect the bedrock but cut across the strata and post date its deposition.

Combined Surface Geology

The Combined Surface Geology map combines all the previous maps into one combined geological overview of your site.

Please consult the legends to the previous maps to interpret the Combined "Surface Geology" map.

Additional Information

More information on 1:50,000 Geological mapping and explanations of rock classifications can be found on the BGS website. Using the LEX Codes in this report, further descriptions of rock types can be obtained by interrogating the 'BGS Lexicon of Named Rock Units'. This database can be accessed by following the 'Information and Data' link on the BGS website.

Regulatory Correspondence

From: Simon Snape <SSnape@hillingdon.gov.uk>
Sent: 29 June 2021 16:34
To: Sana Shah
Subject: RE: Environmental Information Request - ENDEAVOUR SEA SCOUT GROUP, ALEC ROSE HUT, MOORFIELD ROAD, COWLEY, UB8 3SJ

Good Afternoon Sana.

Ref: ENDEAVOUR SEA SCOUT GROUP, ALEC ROSE HUT, MOORFIELD ROAD, COWLEY, UB8 3SJ (the subject site)

Thank you for your enquiry

In response to your questions (*in italics*) regarding the subject site, the following answers (**in bold typeface**) are provided in accordance with available information within the contaminated land / land affected by contamination records held by the Planning Specialists team within the London Borough of Hillingdon Council (LBH):

1. *Pre-license landfill sites within 500m of the subject site, including:*
- *license holder*
 - *location of landfill/grid reference*
 - *nature of fill material*
 - *dates of operation*
 - *details of any leachate/landfill gas problems*

The searched records show 3 former landfill sites within 500m of the subject site:

Site 1 Distance / Direction 390m WSW:

| | |
|-------------------|--|
| Location | packet boat nurseries |
| Period of Use | 1970-1996? |
| Fill Type | Industrial |
| Name Alias | Little Britain |
| Validation | GLC/Planning Mineral Maps |
| Data Last Updated | 20050928 |
| Current Status | Landfill Partly Removed ('clean' inert material) |
| Gas Likely | Low |

Site 2 Distance / Direction 437m West:

| | |
|-------------------|---------------------------------|
| Location | packet boat lane |
| Period of Use | Pre 1964 |
| Fill Type | Mixed |
| Name Alias | Little Britain |
| Validation | GLC/Planning Mineral Maps |
| Data Last Updated | 20050928 |
| Current Status | Landfill |
| Gas Likely | Low to medium (no info on site) |

Site 3 Distance / Direction 475m SSW

| | |
|-------------------|---------------------------|
| Location | river pinn (east) |
| Period of Use | 1978-1984 |
| Fill Type | Construction waste |
| Name Alias | |
| Validation | GLC/Planning Mineral Maps |
| Data Last Updated | 20050928 |
| Current Status | Landfill |
| Gas Likely | Low |

2. *Pollution incidents/known areas of contaminated land within 500m of the subject site, including:*

- *location/grid reference*
- *previous uses*
- *nature/source of pollution*
- *any further details*

The searched records do not contain details of Pollution Incidents (The Environment Agency may hold records). There are no areas of land designated as Contaminated Land within 500m of the subject site

3. *Part B APC authorisations within 500m of the subject site, including:*

- *authorisation holder*
- *location/grid reference*
- *nature of authorisation*

The LBH Public Register does not show any Part B LAPPC authorisations within 500m of the subject site

4. *Private water supplies within 500m of the subject site, including:*

- *location/grid reference*
- *details of source and abstraction purpose*

The searched records do not show any PWS within 500m of the subject site

5. *Storage of Petroleum Hydrocarbons.*

The searched records do not contain details concerning storage of hydrocarbons (the Petroleum Officer may hold details)

6. *Records of any previous Site Investigations on or in close proximity to the site*

The searched records show details concerning recent investigations (on nearby land), they are searchable on the planning portal (Search under Planning Application Ref: 75255/APP/2021/737)

7. *Records of any unexploded ordnance in the site area*

The searched records do not include details of UXO

8. *Any known problems with ground gas in the site area*

The searched records do not identify “problems with ground gas” (please be more specific if information is required)

9. Any potential issues regarding naturally elevated contaminant concentrations.

The searched records do not identify “any potential issues regarding naturally elevated contaminant concentrations” (please be more specific if information is required)

10. Any other information held by your authority which may have an impact upon the contaminative status of the site

the contaminated land / land affected by contamination records held by the Planning Specialists team within the London Borough of Hillingdon Council (The records) contain various types of information – please be more specific if other information is required

I trust the above responses will be suitable for your requirements.

In the meantime, please be aware that the London Borough of Hillingdon Council operates an automated web based system for enquiries concerning land contamination.

Further relevant information and an enquiry form, including our charges for the service, can be found at the following link to the site: -

<https://archive.hillingdon.gov.uk/article/8667/Requesting-environmental-information>

(click on the green button towards the end of the page - it is marked "Contaminated land enquiry form").

Please forward any further land contamination enquiries via our website.

Regards

Simon Snape

Subject: Environmental Information Request - ENDEAVOUR SEA SCOUT GROUP, ALEC ROSE HUT, MOORFIELD ROAD, COWLEY, UB8 3SJ

Good Morning,

I am writing to ask if you could conduct a search for the following details in order for us to complete an environmental review of the above mentioned site. I have attached a site plan for your reference.

1. Pre-license landfill sites within 500m of the subject site, including:
 - license holder
 - location of landfill/grid reference
 - nature of fill material
 - dates of operation
 - details of any leachate/landfill gas problems
2. Pollution incidents/known areas of contaminated land within 500m of the subject site, including:
 - location/grid reference
 - previous uses
 - nature/source of pollution
 - any further details
3. Part B APC authorisations within 500m of the subject site, including:
 - authorisation holder
 - location/grid reference
 - nature of authorisation
4. Private water supplies within 500m of the subject site, including:
 - location/grid reference
 - details of source and abstraction purpose
5. Storage of Petroleum Hydrocarbons.
6. Records of any previous Site Investigations on or in close proximity to the site
7. Records of any unexploded ordnance in the site area
8. Any known problems with ground gas in the site area
9. Any potential issues regarding naturally elevated contaminant concentrations
10. Any other information held by your authority which may have an impact upon the contaminative status of the site

It would be extremely helpful if you could forward us these details at your earliest convenience.

If you require any further information please do not hesitate to contact me.

Kind regards,

Sana Shah

Graduate Geoenvironmental Consultant

Appendix E

Risk Methodologies and Evaluation

Risk Evaluation

The qualitative assessment methodology presented in CIRIA publication C552 (2001) titled '*Contaminated Land Risk Assessment: A Guide to Good Practice*' has been used by TEC for the basis of evaluating potential risk.

The method requires an assessment of the:

- magnitude of the probability or likelihood of the risk occurring (Table 1); and
- magnitude of the potential consequence or severity of the risk occurring (Table 2)

Table 1. Classification of Probability

| Classification | Definition |
|-----------------|---|
| High likelihood | There is a pollution linkage and an event that either appears very likely in the short-term and almost inevitable over the long-term, or there is evidence at the receptor of harm or pollution. |
| Likely | There is a pollution linkage and all the elements are present and in the right place, which means that it is probable that an event will occur. Circumstances are such that an event is not inevitable, but possible in the short-term and likely over the long-term. |
| Low likelihood | There is a pollution linkage and circumstances are possible under which an event could occur. However, it is by no means certain that even over a longer period such an event would take place, and is less likely in the short-term. |
| Unlikely | There is a pollution linkage but circumstances are such that it is improbable that an event would occur even in the very long-term. |

Table 2. Classification of Consequence

| Classification | Definition | Examples |
|----------------|---|---|
| Severe | Short-term (acute) risk to human health likely to result in "significant harm" as defined by the Environment Protection Act 1990, Part IIA. Short-term risk of pollution of sensitive water resource. (Note: Water Resources Act contains no scope for considering significance of pollution). Catastrophic damage to buildings/property. A short-term risk to a particular ecosystem, or organisation forming part of such ecosystem (note: the definitions of ecological systems within the draft circular on Contaminated Land, DETR, 2000). | High concentrations of cyanide on the surface of an informal recreation area. Major spillage of contaminants from site into controlled water. Explosion, causing building collapse (can also equate to a short-term human health risk if buildings are occupied). |
| Medium | Chronic damage to human health ("significant harm" as defined in DETR, 2000). Pollution of sensitive water resources. (Note: Water Resources Act contains no scope for considering significance of pollution). A significant change in a particular ecosystem, or organism forming part of such ecosystem, (note: the definitions of ecological systems within draft circular on Contaminated Land, DETR, 2000). | Concentration of a contaminant from site exceeding the generic or site-specific assessment criteria. Leaching of contaminants from a site to a major or minor aquifer. Death of a species within a designated nature reserve. |
| Mild | Pollution of non-sensitive water resources. Significant damage to crops, buildings, structures and services ("significant harm" as defined in the draft circular on Contaminated Land, DETR, 2000). Damage to sensitive buildings/structures/services or the environment. | Pollution of non-classified groundwater. Damage to building rendering it unsafe to occupy (for example foundation damage resulting in instability). |
| Minor | Harm, although not necessarily significant harm, which may result in a financial loss, or expenditure to resolve. Non-permanent health effects to human health (easily prevented by means such as personal protective clothing etc), easily repairable effects of damage to buildings, structures and services. | The presence of contaminants at such concentrations that protective equipment is required during site works. The loss of plants in a landscaping scheme. Discolouration of concrete. |

The combination of the two factors is determined using Table 3 and the resulting level of risk is described in Table 4. The evaluation can be applied to each of the scenarios identified in the risk model and the overall risk assessed.

Table 3. Combination of Consequence with Probability

| | | Consequence | | | |
|-------------|-----------------|--------------------------|--------------------------|--------------------------|--------------------------|
| | | Severe | Medium | Mild | Minor |
| Probability | High Likelihood | Very High Risk | High Risk | Moderate Risk | Moderate/Low Risk |
| | Likely | High Risk | Moderate Risk | Moderate/Low Risk | Low Risk |
| | Low Likelihood | Moderate Risk | Moderate/Low Risk | Low Risk | Very Low Risk |
| | Unlikely | Moderate/Low Risk | Low Risk | Very Low Risk | Very Low Risk |

Table 4. Description of risks and likely action required

| | |
|-----------------------|--|
| Very High Risk | There is a high probability that severe harm could arise to a designated receptor from an identified hazard, or there is evidence that severe harm to a designated receptor is currently happening. This risk, if realised, is likely to result in a substantial liability. Urgent investigation (if not undertaken already) and remediation are likely to be required. |
| High Risk | Harm is likely to arise to a designated receptor from an identified hazard. Realisation of the risk is likely to present a substantial liability. Urgent investigation (if not undertaken already) is required and remedial works may be necessary in the short-term and are likely over the longer-term. |
| Moderate Risk | It is possible that harm could arise to a designated receptor from an identified hazard. However, it is either relatively unlikely that any such harm would be severe, or if any harm were to occur it is more likely that the harm would be relatively mild. Investigation (if not already undertaken) is normally required to clarify the risk and to determine the potential liability. Some remedial works may be required in the long-term. |
| Low Risk | It is possible that harm could arise to a designated receptor from an identified hazard, but it is likely that this harm, if realised, would at worst normally be mild. |
| Very Low Risk | There is a low possibility that harm could arise to a receptor. In the event of such harm being realised it is not likely to be severe. |

Using the risk model the pollutant linkages are identified and a preliminary estimate of risk undertaken. If there is no pollutant linkage identified, then there is no risk. If the estimate of risk for all the linkages and exposure scenarios is very low at this stage then it is likely that no further assessment will be required.

Test Methods

| SOP | Title | Parameters included | Method summary |
|------|---|---|--|
| 2010 | pH Value of Soils | pH | pH Meter |
| 2030 | Moisture and Stone Content of Soils(Requirement of MCERTS) | Moisture content | Determination of moisture content of soil as a percentage of its as received mass obtained at <37°C. |
| 2040 | Soil Description(Requirement of MCERTS) | Soil description | As received soil is described based upon BS5930 |
| 2120 | Water Soluble Boron, Sulphate, Magnesium & Chromium | Boron; Sulphate; Magnesium; Chromium | Aqueous extraction / ICP-OES |
| 2192 | Asbestos | Asbestos | Polarised light microscopy / Gravimetry |
| 2300 | Cyanides & Thiocyanate in Soils | Free (or easy liberatable) Cyanide; total Cyanide; complex Cyanide; Thiocyanate | Alkaline extraction followed by colorimetric determination using Automated Flow Injection Analyser. |
| 2325 | Sulphide in Soils | Sulphide | Steam distillation with sulphuric acid / analysis by 'Aquakem 600' Discrete Analyser, using N,N-dimethyl-p-phenylenediamine. |
| 2430 | Total Sulphate in soils | Total Sulphate | Acid digestion followed by determination of sulphate in extract by ICP-OES. |
| 2450 | Acid Soluble Metals in Soils | Metals, including: Arsenic; Barium; Beryllium; Cadmium; Chromium; Cobalt; Copper; Lead; Manganese; Mercury; Molybdenum; Nickel; Selenium; Vanadium; Zinc | Acid digestion followed by determination of metals in extract by ICP-MS. |
| 2490 | Hexavalent Chromium in Soils | Chromium [VI] | Soil extracts are prepared by extracting dried and ground soil samples into boiling water. Chromium [VI] is determined by 'Aquakem 600' Discrete Analyser using 1,5-diphenylcarbazide. |
| 2625 | Total Organic Carbon in Soils | Total organic Carbon (TOC) | Determined by high temperature combustion under oxygen, using an Eltra elemental analyser. |
| 2680 | TPH A/A Split | Aliphatics: >C5–C6, >C6–C8,>C8–C10, >C10–C12, >C12–C16, >C16–C21, >C21–C35, >C35– C44Aromatics: >C5–C7, >C7–C8, >C8– C10, >C10–C12, >C12–C16, >C16– C21, >C21– C35, >C35– C44 | Dichloromethane extraction / GCxGC FID detection |
| 2700 | Speciated Polynuclear Aromatic Hydrocarbons (PAH) in Soil by GC-FID | Acenaphthene; Acenaphthylene; Anthracene; Benzo[a]Anthracene; Benzo[a]Pyrene; Benzo[b]Fluoranthene; Benzo[ghi]Perylene; Benzo[k]Fluoranthene; Chrysene; Dibenzo[ah]Anthracene; Fluoranthene; Fluorene; Indeno[123cd]Pyrene; Naphthalene; Phenanthrene; Pyrene | Dichloromethane extraction / GC-FID (GC-FID detection is non-selective and can be subject to interference from co-eluting compounds) |
| 2760 | Volatile Organic Compounds (VOCs) in Soils by Headspace GC-MS | Volatile organic compounds, including BTEX and halogenated Aliphatic/Aromatics.(cf. USEPA Method 8260)*please refer to UKAS schedule | Automated headspace gas chromatographic (GC) analysis of a soil sample, as received, with mass spectrometric (MS) detection of volatile organic compounds. |
| 2920 | Phenols in Soils by HPLC | Phenolic compounds including Resorcinol, Phenol, Methylphenols, Dimethylphenols, 1-Naphthol and TrimethylphenolsNote: chlorophenols are excluded. | 60:40 methanol/water mixture extraction, followed by HPLC determination using electrochemical detection. |

Report Information

Key

| | |
|-----|---|
| U | UKAS accredited |
| M | MCERTS and UKAS accredited |
| N | Unaccredited |
| S | This analysis has been subcontracted to a UKAS accredited laboratory that is accredited for this analysis |
| SN | This analysis has been subcontracted to a UKAS accredited laboratory that is not accredited for this analysis |
| T | This analysis has been subcontracted to an unaccredited laboratory |
| I/S | Insufficient Sample |
| U/S | Unsuitable Sample |
| N/E | not evaluated |
| < | "less than" |
| > | "greater than" |
| SOP | Standard operating procedure |
| LOD | Limit of detection |

Comments or interpretations are beyond the scope of UKAS accreditation

The results relate only to the items tested

Uncertainty of measurement for the determinands tested are available upon request

None of the results in this report have been recovery corrected

All results are expressed on a dry weight basis

The following tests were analysed on samples as received and the results subsequently corrected to a dry weight basis TPH, BTEX, VOCs, SVOCs, PCBs, Phenols

For all other tests the samples were dried at < 37°C prior to analysis

All Asbestos testing is performed at the indicated laboratory

Issue numbers are sequential starting with 1 all subsequent reports are incremented by 1

Sample Deviation Codes

- A - Date of sampling not supplied
- B - Sample age exceeds stability time (sampling to extraction)
- C - Sample not received in appropriate containers
- D - Broken Container
- E - Insufficient Sample (Applies to LOI in Trommel Fines Only)

Sample Retention and Disposal

All soil samples will be retained for a period of 30 days from the date of receipt

All water samples will be retained for 14 days from the date of receipt

Charges may apply to extended sample storage

If you require extended retention of samples, please email your requirements to:

customerservices@chemtest.com
