11th July 2022

Dear Peter,

Old School House, Hillingdon Road – Internal Daylight and Sunlight assessment

I write in relation to my daylight and sunlight report dated 4th April 2022, which considers the perceived daylight and sunlight impacts to the proposed change of use from office to residential at the above mentioned site.

Since the publication of my report, I understand that it is now proposed to retain the eastern section of the building as use class (E). This is shown below.

It should be noted that my report considers the full refurbishment of the building into residential accommodation and the technical assessment carried out showed full compliance with daylight and sunlight BRE criteria.

TBC

Therefore, with the omission of the eastern section from the assessment, I can confirm that there will be no change to the conclusions presented in my report and there will continue to be a 100% compliance with BRE targets.

I trust the above is acceptable and do feel free to get in touch if you need anything further.

Yours sincerely

A handwritten signature in black ink, appearing to read 'S Parker', with a horizontal line underneath the name.
