

Protective fencing

Tree Protection Area

KEEP OUT

Do not move this fence

For more information, please refer to the Arboricultural Method Statement (AMS) and the Tree Protection Plan (TPP).

Trunk Protection

Trunk protection is to be installed for all trees with a DBH of 75mm or greater. The protection should be made of 100mm x 100mm timber posts and 100mm x 100mm timber rails, secured with 100mm x 100mm timber cross-bracing. The protection should be installed at a height of 1.5m above ground level.

Ground boarding

Ground boarding is to be installed for all trees with a DBH of 75mm or greater. The boarding should be made of 100mm x 100mm timber boards, secured with 100mm x 100mm timber posts and 100mm x 100mm timber rails. The boarding should be installed at a height of 1.5m above ground level.

Contamination exclusion zone

A contamination exclusion zone (CEZ) is to be established around all trees with a DBH of 75mm or greater. The CEZ should be made of 100mm x 100mm timber posts and 100mm x 100mm timber rails, secured with 100mm x 100mm timber cross-bracing. The CEZ should be installed at a height of 1.5m above ground level.

Supervision

Supervision is to be provided for all trees with a DBH of 75mm or greater. The supervisor should be a qualified arborist, experienced in tree protection work. The supervisor should be responsible for ensuring that all tree protection measures are installed and maintained in accordance with the AMS and the TPP.

Tree Work Schedule			Notes
1	Site visit	15/06/2023	Initial site visit to assess the trees and the proposed works.
2	Tree Protection Plan (TPP) and Arboricultural Method Statement (AMS) preparation	16/06/2023	Preparation of the TPP and AMS, including the installation of tree protection measures.
3	Installation of tree protection measures	17/06/2023	Installation of the tree protection measures, including the installation of the CEZ, trunk protection, and ground boarding.
4	Supervision of tree protection work	18/06/2023	Supervision of the tree protection work, ensuring that all measures are installed and maintained in accordance with the AMS and the TPP.
5	Final site visit	19/06/2023	Final site visit to assess the trees and the proposed works, ensuring that all measures are installed and maintained in accordance with the AMS and the TPP.

Arboricultural Method Statement

The purpose of this statement is to provide a detailed description of the proposed works, including the installation of tree protection measures, and to ensure that all work is carried out in accordance with the relevant standards and best practice.

The statement is intended to be used by the contractor to guide the installation and maintenance of the tree protection measures, and by the supervisor to ensure that the work is carried out in accordance with the relevant standards and best practice.
