AMMENDMENT/BREAKDOWN

270 High St, Harlington, Hayes, UB3 5DD

16/03/2024

MR SACHIN,

Amendments Requested

1. As per requested the ridge tiles which we put forward to use for the dwelling where concrete. We will amend that and make sure that the ridge tiles used for the project would be of clay.
2. With regards to the second raised point there right now is a single glass roof light installed in the dwelling what I proposed in the previous documents was the following:

RoofLITE Fenstro 45cm x 55cm Skylight Roof

This would replace the single glass panel which is installed on the dwelling at present which is allowing water to ingress into the dwelling. We would get the closest size available to the glass which is their present at the moment If need be may need build frame to house the new Roof light.

It will be installed with the flashing around the outside circumference of the roof Skylight.

If there is any other information which you require please don't hesitate to contact us.

Thank you

Kind Regards
Bipan
