### 240 Litre Wheelie Bin

Ideal for replacing damaged kerbside bins, the 240L wheelie bin is the waste container most commonly used by councils for bin collections. Its high capacity and durable construction make this suitable for all waste products. However, with different colours serving different waste purposes, we recommend that you check with your local authority for which colours they prefer for each waste stream.

### Features and Benefits

Produced using a compact injection moulding process that meets DIN EN 840 and RAL GZ 951/1 criteria

Constructed from specially developed, high-density polyethylene that is designed to be hard wearing and durable

Stabilised against the effects of UV rays and resistant to temperature variations and chemicals

2x 20cm quiet-running, solid rubber wheels that can be easily changed in the unlikely event of damage

Zinc-plated steel axle is resistant to corrosion

Smooth surfaces and contours enable easy cleaning

Lid is equipped with handles to facilitate easy opening

Sturdy handle at rear of bin assists with easy movement of empty or full containers

Bins can be stacked high due to sturdy stacking ribs, saving on space and transportation costs

All parts of the wheelie bin can be recycled once container has reached the end of its useful life, reducing its environmental impact

Also available in Black, Blue, Dark Blue Brown, Green, Orange, Purple, Light Grey and Red

Containers can be embossed, hot-stamped or screen printed to your requirement, but this may impact on lead times
