

Image of door which is to be replicated as closely as possible to provide harmony to street elevation.

#### PROPOSED NEW ENTRANCE: 1:20

As shown in the elevation drawing above, the new entranceway door will match the proportions of the doors that are currently housed next door. This will ensure that the door is of suitable size and proportion, and therefore, not detract from the heritage qualities of the building. Glazing will be used to allow light to enter the internal corridor, making the entrance comfortable and more importantly, safe. The door will be solid timber to match similar properties in the area.
