

#### PROPOSED NEW ENTRANCE: 1:20

The insertion of the new entrance will mean that the existing stone plinth will need to be carefully removed by the contractor. The stone pilaster to the right of the new entrance will remain and be carefully preserved during any works. The large glazed panels to the left of the new entrance will also remain. The drawing above and the marked up photograph show the extent of the removal works.

The image above (taken 22/03/2023) shows the area of the existing glazing and stone plinth that will be carefully removed to make way for the new entrance way.
