3rd February 2014

Dear Sir/Madam,

REF: 8721/APP/2013/1508

Please find enclosed the relevant additional documents regarding the planning application for the proposed work to Colham Manor primary school.

The proposal identifies increasing the existing playground area to accommodate the previously approved increased pupil numbers and create a stronger connection between the school building and existing enclosed playground area. The additional playground space will be enclosed with fencing and access gates to provide a secure and safe space for the pupil's during their outdoor play.

The application submitted by the school was made on the 4th June 2013 and the application was 'paused' at validation stage due to missing information (**Ref: 8721/APP/2013/1508**). A fee of £385 was made to Hillingdon council for the application (please find enclosed planning fee form).

This additional information addresses the development of the same character and description as the previous application and therefore seen as exempt from additional fees. All proposals relating to the proposed car park have been omitted from this application.

We trust that the above information and documents enclosed will allow you to approve the planning application. Please do not hesitate to contact the undersigned if you require anything further.

Yours sincerely,

David Jarrard
