Dear Robert,

It was good to meet with you last Friday and also good to see we are now of a like mind when it comes to the kind of planting that we will be proposing around the waste store.

I have attached a pdf of the revised plan showing taller planting to the street side and end of the store and lower level planting to the gap between the store and the internal path.

For the taller planting I would suggest going with a native mixture of 20% Hazel (Coryllus avellana), 30%Hawthorn (Crataegus monogyna), 20%Blackthorn (Prunus spinosa), 10%Crab Apple (Malus Sylvestris), 15% Field Maple (Acer campestre) and 5% Dog Rose (Rosa canina). These would be bare root, approx 1.5m high when planted and slightly staggered at 4no. per metre. We would recommend the use of a mycorrhizal fungi, such as Rootgrow, to aid growth.

For the low level planting I felt we could use various masses of Rosemary (Rosmarinus officinalis) – 5l pots, Lavender (Lavandula angustifolia 'Hidcote') – 5l pots - and Potentilla yellow (Potentilla Yellow) – 2l pots.

I would be grateful for your comments and look forward to hearing from you soon.

Regards,

David Whitestone
