The image shows a detailed architectural floor plan of a building. The plan includes several rooms of varying sizes, some with internal partitions. A large central area, likely a hall or lobby, features a prominent staircase. Numerous windows are distributed throughout the building, with some having decorative frames. The plan is enclosed by a thick black border.

## Note

The basement is fully contained within the external walls of the ground floor and only covers a little over half of the depth of the building front to back.

The basement is used for storage and building services only (ie there are no habitable rooms within the basement).

Externally to the building none of the basement shall be visible from above ground.
